Smart Solutions

Integration Solutions made Easy

InterWeave **Smart** Solutions
AUTHORIZE.NET CIM WITH YOUR CRM

InterWeave **SMART** Solutions deliver powerful yet easy-to-use configurable integration Solutions, now allowing seamless integration of data from your CRM to Authorize.net Customer Information Management.

Payment Data Tokenization

InterWeave and Authorize.net Customer Information Manager (CIM) now work together to tokenize and store your customers' sensitive payment information on Authorize.net's secure servers, simplifying your PCI DSS compliance as well as the payments process for returning customers and recurring transactions.

How InterWeave **and CIM work together**

The CIM supports customer profiles that include billing, payment and shipping information. Each profile is stored on Authorize.net's secure servers and assigned an ID that is used in place of all customer information. Each customer profile can include up to 10 payment profiles and up to 100 shipping profiles. You can now manage customer profiles and issue transactions manually or automatically from within your CRM Account and Opportunity/Quote/Object page. The hosted CIM option further alleviates the scope and complexity of PCI DSS compliance. It provides a way for you to establish a hosted connection with Authorize.net that allows the exchange of sensitive cardholder data to happen completely on their secure servers, automated by **Inter**Weave, directly from your CRM.

Smart Payment **Gateway Details**

Connecting a CRM application or Web site to the payment processing networks is exceptionally difficult and typically beyond the expertise and technical resources of most online customers. Instead, customers can easily integrate the **Inter**Weave **Smart** Payment **Gateway** (**ISPG**) with their CRM and connect with your payment processors. **ISPG** provides the data structure, workflow and complex processing logic, support and security necessary to ensure fast, reliable and secure transmission of transaction data. **ISPG** manages the routing of transactions just like a traditional credit card swipe machine you find in the physical retail world, however, **ISPG** uses the Internet instead of a phone line. Once installed, **ISPG** is available 24/7 for processing transactions.

ISPG offers many features and options that can be tailored to specific merchant business models. To learn more about how **ISPG** can support your particular business, please contact us at 203 274 5226, email sales@interweave.biz or go to www.interweave.biz.
