

InterWeave Smart Solutions

SMART PAYMENT GATEWAY

InterWeave **SMART** Solutions deliver powerful yet easy-to-use configurable integration Solutions, allowing seamless integration of data from your CRM (Salesforce, SugarCRM) or Web Sites to Merchant Providers.

InterWeave Smart Payment Gateway

Background on Merchant Accounts

A merchant bank is a financial institution that provides business level accounts to merchants for collecting payments from consumer bank or credit card accounts. If you're already selling products from a retail location, you probably have a Card Present (CP) merchant account. However, to sell from your Web site, you'll also need a Card Not Present (CNP) merchant account. A CNP account is used by merchants that receive payments via the Internet or in situations when a payment is not physically presented to the merchant by the consumer at the time of the transaction (e.g. telephone orders).

In the payments industry, Independent Sales Organizations (ISOs), Merchant Services Providers (MSPs), and Value-Add Resellers (VARs) are most often the organizations that provide merchant accounts. The First Data Directory located at <http://www.firstdatacardprocessing.com/index.html> and lists numerous such companies. You can also contact your current banking partner to find out if they provide CNP merchant accounts.

Smart Payment Gateway Details

Connecting a CRM application or Web site to the payment processing networks is exceptionally difficult and typically beyond the expertise and technical resources of most online customers. Instead, customers can easily integrate the InterWeave **Smart Payment** Gateway (ISPG) with their application and connect with payment processors like Authorize.net, Transfirst, Chase Paymenttech, First Data, PayPal and many more. ISPG provides the data structure, workflow and complex processing logic, support and security necessary to ensure fast, reliable and secure transmission of transaction data. ISPG manages the routing of transactions just like a traditional credit card swipe machine you find in the physical retail world, however, ISPG uses the Internet instead of a phone line. Once installed, ISPG is available 24/7 for processing transactions.

ISPG offers many features and options that can be tailored to specific merchant business models. To learn more about how ISPG can support your particular business, please contact us at 203 274 5226, email sales@interweave.biz or go to www.interweave.biz.

Featured Gateways include:

Below are just some of the Gateways that have been delivered. Don't see the one below that you need? Just ask.

- Authorize.net
- Transfirst

InterWeave Smart Solutions

SMART PAYMENT GATEWAY

InterWeave **SMART** Solutions deliver powerful yet easy-to-use configurable integration Solutions, allowing seamless integration of data from your CRM (Salesforce, SugarCRM) or Web Sites to Merchant Providers.

Credit Card Payment Flow

The electronic payment process may be difficult to understand at first. The diagram below illustrates the flow of payment information and funds from a customer's Salesforce.com or Web site to their selected payment processors and back.

Step 1: A customer submits a credit card or electronic check transaction in Salesforce.com or their Website. The transaction then integrates with the selected payment processor (First Data) via a secure connection.

Step 2: First Data receives the secure transaction information and passes it via a secure connection to your bank's processor (a financial partner that provides credit card processing on behalf of the credit card associations, for example, Visa or MasterCard).

Step 3: Your bank's processor submits the transaction to the Credit Card Interchange (a network of financial entities that communicate to manage the processing, clearing, and settlement of credit card transactions).

Step 4: The Credit Card Interchange routes the transaction to your customer's Credit Card Issuer.

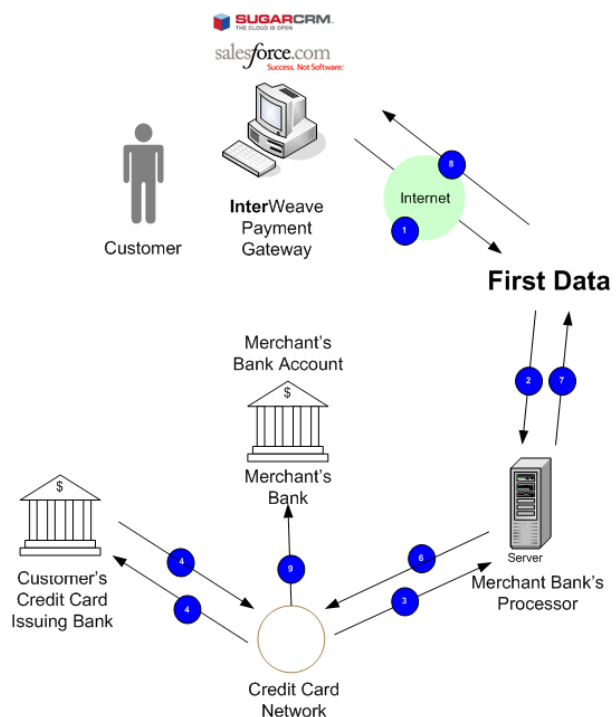

Step 5: The Credit Card Issuer approves or declines the transaction based on the customer's available funds and passes the transaction results, and if approved, the appropriate funds, back through the Credit Card Interchange.

Step 6: The Credit Card Interchange relays the transaction results to your bank's processor.

Step 7: Your bank's processor relays the transaction results to First Data.

Step 8: First Data stores the transaction results and sends them to you and/or your customer. This communication process averages three seconds or less!

Step 9: The Credit Card Interchange passes the appropriate funds for the transaction to your bank, which then deposits funds into your merchant bank account.

Automated Recurring Billing

Automated Recurring Billing (ARB) is a convenient and easy-to-use tool for submitting and managing recurring, or subscription-based transactions. You can take advantage of ARB's flexible features to enhance customer service and build customer loyalty, while reducing authorization declines and overall administrative costs.

Customers recurring payment schedules are located in the transaction object; includes the customer's payment information, a billing amount, and payment schedule.

Integration Solutions made Easy

InterWeave Smart Solutions

SMART PAYMENT GATEWAY

InterWeave **SMART** Solutions deliver powerful yet easy-to-use configurable integration Solutions, allowing seamless integration of data from your CRM (Salesforce, SugarCRM) or Web Sites to Merchant Providers.

Your CRM_Authorize.net Process and Payment Flow

Below is an Opportunity that we have added the three sections with the custom fields for CC and ACH payment processing; CC & E-Check Payment Details (Scheduled), CC & E-Check Payment Details (Recurring) and Bank Account and CC Details. In the example below, your customer agreed to your quote and now your going to set up the billing process. Three distinct or combined options are available; Real-time Accept or Decline, Scheduled Payments or Recurring Payments.

Step 1: Enter the Base Information.

Enter your customers Bank Account and Credit Card Details in the third section.

Step 2: Process a Credit Card Transaction.

Enter the Credit Card & E-Check Payment Details for Real-Time Accept or Decline in the first section. To charge \$100 on 06/11 on your Visa, enter the information and click on the custom button—Process CC or E-Check to consummate the transaction.

Step 3: Process a Scheduled Transaction.

Set up Scheduled Payments in the first section. Charge \$200 on 07/11 on your Visa. Set up Recurring Payments in the second section. Check the Recurring Monthly Payment, enter the Payment Start Date, put in number of months recurring and day of month to bill on, and the monthly payment amount (\$100).

With the InterWeave Enterprise Edition, this will automatically be processed.

Scheduled Payments

Scheduled payments allows you to set up a remaining balance payment for a customer to execute automatically.

Automated Recurring Billing

If a customer is looking for a payment plan, Automated Recurring Billing (ARB) is a convenient and easy-to-use features submitting and managing recurring, or subscription based transactions.

Custom Recurring Billing

InterWeave can create custom schedules for your specific payment plan. Custom Recurring Billing (CRB) is a convenient and easy-to-use features submitting
